

ADMA Biologics – Boca Raton

CASE STUDY

PROJECT OVERVIEW

ADMA Biologics is a biopharmaceutical company, newly opened in Boca Raton.

ADMA is relentlessly committed to creating superior products for immunodeficient patients at risk for infection.

Sign Partners was approached by a marketing company to execute all of ADMA's signage needs, both indoor and outdoor, needing to make an impactful statement for the team.

The project started with a request for exterior monument signs. The property had two existing structures and needed to be customized for ADMA Biologics. The main objective was to incorporate the branding and help implement motivational office branding.

The interior signage needs were mainly focused around their mission statement. The lobby is transformed with two custom large panel graphics, to help emphasize the mission. Accompanied with brushed aluminum dimensional letters above the reception area, while a newly branded light box illuminates from behind the reception desk.

Furthermore, Sign Partners customized the exterior entrance windows, indicating the lobby/guest check-in.

A fun aspect of this project was to have the custom motivational graphics placed strategically throughout the two facilities.
